

SPORTS-DAY PREDICTOR.

By: Jonathan White

A simple way to make predictions or bets on your favorite sports teams or players.

Battle your friends for points on the leaderboard as well!

<https://github.com/ksu-is/SportsDayPredictor.git>

```
app.py
app.py
app = Flask(__name__)
app.secret_key = "supersecretkey"

#-----DATABASE-----
def get_db():
    return sqlite3.connect("database.db")

def init_db():
    conn = get_db()
    c = conn.cursor()
    c.execute('CREATE TABLE IF NOT EXISTS users(id INTEGER PRIMARY KEY AUTOINCREMENT, username TEXT UNIQUE)')
    c.execute('CREATE TABLE IF NOT EXISTS predictions ( id INTEGER PRIMARY KEY AUTOINCREMENT,
    user TEXT,
    game TEXT,
    prediction TEXT,
    result TEXT,
    points INTEGER DEFAULT 0
    )')

    conn.commit()
    conn.close()

    init_db()

#-----SAMPLE GAMES-----

games = [
    "Hawks vs Knicks",
    "Braves vs phillies",
    "Lakers vs Rockets",
    "Dodgers vs Giants"
]

#-----HOME-----
@app.route("/")
def home():
    if "user" not in session:
        return redirect("/login")
    return render_template("home.html", user=session["user"], games=games)

#-----LOGIN-----
@app.route("/login", methods=["GET", "POST"])
def login():
    if request.method == "POST":
        username = request.form["username"]
```
